Subject: [External] FW: Contact the EPA about Pesticides

Hi Suzanne:

I'm forwarding this email chain to you for your information and records. It looks like a complaint was submitted to EPA Headquarters related to the use of dicamba in Champaign County over the summer. OPP forwarded this information to us about 6 months later in December. Estrella has also forwarded this to our air enforcement group since the original complaint mentions air monitoring.

Please let me know if I can provide any additional information.

Thanks!

Claudia Niess
Enforcement Officer
Pesticides & Toxics Compliance Section

Claudia,

Are you aware of the below tip and complaint in Illinois? This was forwarded to me while I was out.

Regards,

Abigail Wesley

Good morning Abigail,

Are you able to respond to this inquiry/request?

Thanks

Subject: Fw: Contact the EPA about Pesticides

Hi.

This dicamba complaint came into the HQ pesticides webmail queue, but the fellow is apparently not happy with his state lead agency's handling of the situation. Is this something R5 can follow-up on?

Thanks,

Sincerely,

Communication Services Branch
Field and External Affairs Division
Office of Pesticide Programs

Comments : Dicamba cas # 1918-00-9Near Champaign County Il we have a dilemma here ever farmers field not dicamba resistent is showing signs of damage. old Farmers are even starting to complain about not being able to breathe and don't really know why? It's dicamba it's everywhere people in town are starting to ask about it it's on the local news daily .. It's not looking good for dicamba around here and the EPA sits on their hands after beiong asked to provide air quality testing off site movement because The EPA response is this. The Illinois Department of ag id responsible for monitoring pesitcide under FIFRA. Well guess what the Illinois department of Ag has notified me that it will be 4 to 6 weeks before they could be available to investigate off site movement could be around harvest time no evidence this whole process is a sham Your office shoukld be held accountable as well as the Illinois Department of Agriculture More than just a few people are starting to see the corruption. Do me and the public a favor send someone to east central Illinois with supper sniffers to monitor air quality, send someone to collect leaves off the damaged plants and trees and do some analyticals, and at least make an effort that your trying or actually doing something. My family has to keep windows closed because of dicamba. This is ridiculous.Any questions please call Ex. 6 Personal Privacy (PP) So far your office after submitting a Air quality complaint related to particulates has failed to even respond with a call acknowledging this matter however the good news here is the local news reporters are willing to cover this as an issue today.
